IDetect Handheld Update

- EXIT THE IDETECT APPLICATION ON THE IDETECT HANDHELD BY CLICKING ON LOGOUT/EXIT UNTIL YOU ARE BACK AT THE WINDOWS CE SCREEN.
- Hook up the handheld to your desktop PC via the USB Cable and run Active Sync (See comprehensive manual)
- Click on the *Handheld Update* link, SAVE THE FILE TO YOUR **DESKTOP** on your PC.
- After obtaining the update password from IDetect, Inc., Double click the IDETECT.EXE file and select to extract the files TO YOUR PC'S **DESKTOP** by clicking on the browse button on the left side of the box that comes up.
- From your PC's Desktop, go to the newly created folder **IDetect Handheld** then the new version number folder, then double click on the file SETUP.EXE that is within this folder. Follow the prompts on your screen.
- Your handheld is now updated.
