

License Camera Box Installation

1. **Important:** Place the Logitech camera into the side USB port of the IDetect system.
2. Find the plastic License camera box. Remove the plastic paper on the Velcro, and stick the entire License Box onto the left front part of the computer (just left of the scanner).
3. Remove the Logitech Camera from its pouch. Place the rubber foot into the clamping portion of the camera as shown on the figure on the plastic bag that the rubber foot was in.
4. Clamp the camera with the rubber foot installed onto it onto the License box facing downward.
